- Number of customers that were not retain by the company accounted for 73.46% .

INSIGHT ANALYSIS:

Why the company was able to retain some of their customers:

The following are the factors that cause the company to retain their customers

- The Contract they offer**: when the Contract they offer is month to month , Churn is 6.36 times more likely to be Yes compared to all other Contract services they offer. That means the company is 6.36times more likely to get their customers when contract offered is month to month. this influencer contains 55.02% of the data which is 3,875.
- The Num of Tech Tickets**: when the num of tech tickets increase churn is more likely to be Yes. For example a growth of 1.25 in the num of tickets leads to a 5.70 times growth in likelihood of Churn being Yes .This contains 26.54% of data
- The Tenure**: When the tenure goes down by 24.56 in the dataset, churn is 4.56 times more likely to be Yes. That means customers who has a tenure of 24.56 and below are 4.56 times likely to be retain by the company. This contains 24.54% of the data.
- Online Security**: When online security is No, churn is 3.63 times likely to be Yes. That means customers who do not subscribe to online security are 3.63 times more likely to be retain by the company. This influencer contains 49.6% of the data.
- Tech Support**: when tech support is No, churn is 3.51 times more likely to be Yes compared to all the values of tech support .this means customers who do not subscribe to tech support services are 3.51 times more likely to be retain by the company.This influencer contains approximately 49.31% of the data.
- Internet services**: when internet services is fiber optic ,churn is 2.89 times more likely to be Yes compared to all other values of internet services. this means customers who subscribe to the fiber optic internet services are 2.89 times more likely to be retain by the company. This influencer contains approximately 43.96% of the data.

Why the company was not able to retain some customers

The following are some of the factors that caused the company not to retain their customers

- Number of Tech Ticket**: When the number of tech tickets decreases , the likelihood of churn being No increases for example a fall of 1.25 in the number of tickets leads to a 5.67 times growth in likelihood of churn being No. This influencer contains approximately 73.46% of the data.
- Tenure**: when the number of tenure increases, the likelihood of churn being No also increases. For example a growth of 24.56 in the num of tenure leads to a 4.52 times growth in likelihood of churn being No .In summary what this means is that, long-term customers are 4.52 times not likely to be retain by the company. This influencer contains approximately 73.46% of the data.
- Senior Citizen** : When the number of a senior citizen is 0 , churn is 1.31times more likely to be No. this means when the number of senior citizen is 0 the company is 1.31times not likely to retain them . This influencer contains 83.79% of the data.
- Total Charges**: When the total charges ranges from 347.65-3273.55, the company is 1.05times not likely to retain the customers. This influencer contains 47.75% of the data.

RECOMENDATION : The company should organize a meeting with their customers especially the long term customers, and senior citizen to know the problems they are facing with the company's services and deduce ways to solve those problems for them to be satisfied with the companies services. Secondly the company must find out what cause the decrease in number of tech ticket and resolve those issues
